NPIC/TSSG/RED-125-70
22 April 1970

MEMORANDUM FOR: Chief, Projects & Programs Staff, TSSG

ATTENTION   : [   ]   25X1

SUBJECT   : Candidates for Offutt Training

   1. We have reviewed the three RED candidates for Offutt Training the week of 8 June 1970. The list of priorities as originally scheduled is, of course, quite out of date. The individuals involved at the time of the original listing were located in separate divisions and different branches and sections. All three individuals are now located in one branch and two of them in the same section. This factor makes it impractical for all three to attend. In addition, travel funds do not permit us to support three nominations at this time.

   2. I have reviewed our nominations and recommend that [   ]   25X1
attend this session, and although we do not have travel funds programmed for this training, we will try to accommodate it by adjustments in our schedule. [   ] could not afford to be gone during that time frame. Because of anticipated leave, he would be gone from his responsibilities for too long a period of time. Because he has already gone through a PI training course program, it is felt that attendance at this course would provide marginal benefit. It is requested that [   ]   25X1
be given high priority for any future session. It is impractical for him to attend this session because of the above considerations and because the Tech/Ops equipment, which he is responsible for, will be delivered during that time frame, and he and [   ] are assigned to the same   25X1
section. RED has no substitutes to offer at this time.

   3. It is strongly recommended that the old list of priorities, which is now too out of date to be valid, be reviewed by TSSG and that an updated listing be presented to the Office of Training.
